**Clove Dental bags TiE Awards 2019 for Fastest Growing Business of year in India**

**New Delhi, Nov 7, 2019:** Clove Dental has bagged the prestigious TiE London Awards 2019 for being the fastest-growing business of the year in India after a multi-phase process of selection and analysis by a panel comprising distinguished personalities. The award recognises and encourages entrepreneurs for innovation and excellence.

India's leading oral healthcare chain, Clove Dental has always been instrumental in providing best oral healthcare services and making it accessible and affordable for all sections of the society. Established in 2011, Clove Dental has been deploying affordable, high-quality and ethical care. With its first clinic, eight years ago, to its presence in 26 Indian cities, Clove is a pioneer in delivering highest clinical outcomes through a vision of patient-care-excellence, and quality standards that are constantly monitored.

With Clove's ethical, innovation rich, and exceptional management team, the group has seen tremendous growth in Indian marketplaces. It has grown 500% in the last three years to 345 clinics.

While receiving the award from TiE President Nina Amin, Mr Louis Shakinovsky said, "Winning awards from International Prestigious and reputable organizations is a wonderful recognition for Clove's achievements. The award that we want to continue to win is the Patient Happiness Award. That will continue to make Clove a great company."

"Global burden of oral diseases and lack of awareness among people about their dental health are two main factors that raise the demand of quality and affordable healthcare provider in a country like India. Clove Dental with its quality, ethics and transparency is dedicated to reaching out to the bigger audience to meet its goals," he added.

The leading dental chain has also been recognised in past for being a symbol of excellence in Health and Wellness. Clove Dental has been extending its footprints offering the latest technology for quality healthcare of the patients and with the motive to address the critical need of dental awareness among masses.
